GO Biological Process Enrichment − Liver−up Genes
regulation of hormone levels
steroid metabolic process
fatty acid metabolic process
response to xenobiotic stimulus
xenobiotic metabolic process
sterol metabolic process
cellular response to xenobiotic stimulus
blood coagulation
coagulation
hemostasis
liver development
hepaticobiliary system development
estrogen metabolic process
pigment metabolic process
negative regulation of wound healing
negative regulation of blood coagulation
negative regulation of hemostasis
negative regulation of coagulation
fibrinolysis
flavonoid metabolic process
